

REMARKS

[0001] Applicant's attorney respectfully requests reconsideration and allowance of all of the claims of the application. Claims 1-10 and 25-35 are presently pending. Claims 25, 34, and 35 are amended herein. Claim 31 is canceled.

Formal Request for an Interview

[0002] If the Examiner's reply to this communication is anything other than allowance of all pending claims, then I formally request an interview with the Examiner. I encourage the Examiner to call me—the undersigned representative for the Applicant—so that we can talk about this matter so as to resolve any outstanding issues quickly and efficiently over the phone.

[0003] Please contact me to schedule a date and time for a telephone interview that is most convenient for both of us. While email works great for me, I welcome your call as well. My contact information may be found on the last page of this response.

Allowable Subject Matter

[0004] Applicant's attorney would like to thank the Examiner for allowing claims 1-10, 26-28, 32, and 33. These claims have not been amended and, therefore, remain allowable.

Substantive Matters

Claim Rejections under § 102

[0005] The Examiner rejects claims 25, 29-31 and 34-35 under § 102. For the reasons set forth below, the Examiner has not shown that the cited reference anticipates the rejected claims.

[0006] Accordingly, Applicant's attorney respectfully requests that the § 102 rejections be withdrawn and the case be passed along to issuance.

[0007] The Examiner's rejections are based upon the following reference:

- **US Patent No. 5,834,987 to Dent:** "*Dent*" hereinafter, (issued November 10, 1998).

Anticipation Rejections

[0008] Applicant's attorney submits that the anticipation rejections are not valid because, for each rejected claim, no single reference discloses each and every element of that rejected claim.¹ Furthermore, the elements disclosed in the single reference are not arranged in the manner recited by each rejected claim.²

Based upon *Dent*

[0009] The Examiner rejects claims 25, 29-31 and 34-35 under 35 U.S.C. § 102(b) as being anticipated by *Dent*. Applicant's attorney respectfully traverses the rejection of these claims. Based on the reasons given below, Applicant's attorney asks the Examiner to withdraw the rejection of these claims.

Independent Claim 25

[0010] Applicant's attorney submits that *Dent* does not anticipate this claim because it does not disclose all of the elements as recited in this claim. In specific, amended claim 25 recites that the feedback signal comprises a signal having a frequency of the output signal divided by a dividing ratio, the dividing ratio being modulated according to the modulation value.

¹ "A claim is anticipated only if each and every element as set forth in the claim is found, either expressly or inherently described, in a single prior art reference." *Verdegaal Bros. v. Union Oil Co. of California*, 814 F.2d 628, 631, 2 USPQ2d 1051, 1053 (Fed. Cir. 1987); also see MPEP §2131.

² See *In re Bond*, 910 F.2d 831, 15 USPQ2d 1566 (Fed. Cir. 1990).

[0011] In contrast, the Examiner has acknowledged that this is a recitation that is not taught by any prior art of record. *Dent* does not teach that any signal used that is modified by a modulated diving ratio. The Examiner expressly acknowledges this difference in the allowance of claims 1, 10, 26 and 32. Therefore, claim 25 is also allowable for at least this reason. Consequently, *Dent* does not disclose all of the elements and features of this claim. Accordingly, Applicant's attorney asks the Examiner to withdraw the rejection of this claim.

Dependent Claims 29-30

[0012] These claims ultimately depend upon independent claim 25. As discussed above, claim 25 is allowable. It is axiomatic that any dependent claim which depends from an allowable base claim is also allowable. Additionally, some or all of these claims may also be allowable for additional independent reasons.

Dependent Claim 34

[0013] This claim ultimately depends upon independent claim 32. As discussed above, claim 32 is allowable. It is axiomatic that any dependent claim which depends from an allowable base claim is also allowable. Additionally, this claim may also be allowable for additional independent reasons.

Independent Claim 35

[0014] Applicant's attorney submits that *Dent* does not anticipate this claim because it does not disclose all of the elements as recited in this claim. In specific, amended claim 25 recites that the feedback signal comprises a signal having a frequency of the output signal divided by a dividing ratio, the dividing ratio being modulated according to the modulation value.

[0015] In contrast, the Examiner has acknowledged that this is a recitation that is not taught by any prior art of record. *Dent* does not teach that any signal used that is modified by a modulated diving ratio. The Examiner expressly acknowledges this difference in the allowance of claims 1, 10, 26 and 32. Therefore, claim 25 is also allowable for at least this reason. Consequently, *Dent* does not disclose all of the elements and features of this claim. Accordingly, Applicant's attorney asks the Examiner to withdraw the rejection of this claim.

Conclusion

[0016] All pending claims are in condition for allowance. Applicant's attorney respectfully requests reconsideration and prompt issuance of the application. If any issues remain that prevent issuance of this application, the **Examiner is urged to contact me before issuing a subsequent Action.**
